Задача

end

Сайт позволяет разместить объявление о ненужном тубусе, что достаточно актуально, так как предметы, такие как начертательная геометрия или инженерная графика, у многих длятся всего пару семестров. И возможность после их окончания отдать их нуждающемуся, например, первокурснику была бы полезной.

На сайте пользователь = объявление, пользователи не могут существовать без него. Поэтому регистрация = добавление объявления. Для тех юзеров, кто хочет найти себе тубус, есть доступ к главной странице с объявлением и без авторизации. Там по нажатию на кнопку «Показать больше» отображаются контакты для связи с автором понравившегося объявления.

Код реализации

```
